PROFESSIONAL SUMMARY

MIS student at the University of Georgia with an emphasis in Business Analytics. Builds AI-powered decision-support and reporting tools for owner-operated businesses, and turns unstructured requirements into repeatable processes. Skilled in SQL, Python, Tableau, and BPMN process modeling. Bilingual in English and Spanish.

EDUCATION

University of Georgia

Athens, GA

B.B.A. in Management Information Systems, Area of Emphasis in Business Analytics; Minor in Spanish

Expected May 2027

Relevant Coursework: Machine Learning and Business Analytics, Data Management and Analytics, Predictive Modeling and Optimization, Business Process Management, Project Management, Secure Cloud Development

EXPERIENCE

UGA Competitive Sports

Athens, GA

Program Assistant (Aug 2026 – Present) · Site Manager (Fall 2025 – Aug 2026) · Referee (Mar 2024 – Fall 2025)

- Promoted twice in two years to the senior student staff role, advancing from referee directly to site manager and bypassing the supervisor level; qualified to work every position on the staff ladder.
- Review and adjudicate club-sport participation waivers against eligibility policy, approving or denying each and documenting the reasoning behind the decision.
- Present real job scenarios at supervisor staff training, working through how each case should be handled.
- As site manager, oversaw daily operations for intramural and club sports events as primary on-site decision-maker, resolving issues in real time and ensuring policy and safety compliance.

Inside Sales Engineer Intern

May 2024 – Aug 2024

Tensar, A Division of CMC

- Built the company's Latin America market analysis from scratch, identifying ~200 target companies and infrastructure projects across the region.
- Presented findings to company leadership and delivered the completed analysis to the LATAM sales team as a prospecting resource for the region.

PROJECTS

Toros Dealer Growth & Distribution Platform

Custom GPT, Knowledge Base Design

- Designed and built a dealer acquisition and wholesale growth system for Toros Knife & Tool, replacing manual retailer research and ad hoc outreach with one repeatable, operational process.
- Defined a dealer scoring methodology (1–5 fit score, A–D priority tier) weighing product fit, brand alignment, acquisition probability, and revenue potential, so outreach targets the highest-value accounts first.
- Built six integrated knowledge bases covering product intelligence, retailer leads, dealer rankings, and wholesale terms, plus a retailer-specific outreach generator producing emails, call scripts, and objection responses.

AI Operations Reporting Tool

Python, OpenAI API, Jupyter Notebook

- Built a tool that pulls revenue, labor, supply, and inventory data and uses the OpenAI API to generate plain-English weekly operations reports for owner-operated businesses.
- Automated the analysis to surface trends, risks, and recommendations for owners without a data background.

NYC Baby Names Analysis

SQL, Tableau

- Analyzed 69,000 New York City birth records (2011–2021) and found name popularity tracking media exposure: Zendaya peaked in 2013–2014 during her television run, and Zuri surged after the show that popularized it.
- Corrected duplicate name records split across letter casing with a calculated field and converted birth year to a date type for time-series analysis; built Tableau dashboards for non-technical readers.

ACTIVITIES & LEADERSHIP

Nest Run Club — Founding Member / Pacer

Aug 2024 – Present

- Helped found a community running club that has grown to 600+ members, drawing up to 60 runners to twice-monthly group runs; serves as a pacer.

UGA Club Soccer Team — Member

Nov 2025 – Present

Hispanic Student Association — Member

Aug 2024 – Present

SKILLS

Data and Analytics: SQL, Python, R, Tableau, Excel

Business and Systems: BPMN process modeling, requirements analysis, data modeling, workflow optimization

Tools and Platforms: GitHub, Signavio, Jupyter Notebook, Google Colab, OpenAI API, Claude

Languages: English (native), Spanish (proficient)
